01 PROFILE

Dedicated software developer with over 5 years of experience in developing high-quality web applications. Proficient in front-end and back-end development with a strong emphasis on clean code, problem-solving, and teamwork. Experienced in JavaScript on the frontend (React, Redux, Typescript), and many others on the backend such as Python, Node.js, Ruby, and various testing frameworks. Adept at working in agile environments and collaborating effectively within teams of all sizes.

02 EMPLOYMENT HISTORY

Feb 2025 — Present

Helsinki

Senior Frontend Engineer at Limber AS

- Leading the development of new features and maintaining core platform functionality using TypeScript, Lit.js, and modern browser APIs, ensuring scalability and performance.
- Collaborating cross-functionally to design and implement DOM-intensive features with a focus on maintainability.

Jul 2023 — Feb 2025

Helsinki

Frontend Developer at Firetail.io

- Develop and maintain UI components using React, Typescript, Tailwind, and Ant Design.
- Implement and manage CI/CD pipelines with GitHub Actions and AWS.
- Conduct testing using Jest, Cypress, and React Testing Library.
- Occasionally contribute to backend development using Python.

Jan 2023 — Jul 2023

Helsinki

Senior Fullstack Developer at Sayduck

- Enhanced e-commerce 3D-web software, focusing on backend development with Ruby on Rails.
- Developed and maintained 3D model viewer and UI components using React, Typescript, and Three.js.
- Ensured code quality and performance through rigorous testing and optimization.

Jan 2022 — Nov 2022

Munich

Software Developer at Izz.ai

- Developed front-end solutions for Engel & Völkers, utilizing React, Typescript, Next.js, and Material UI.

Feb 2021 — Jan 2022

Stockholm

Software Developer at Coronation

- Built and refined React.js components for iamai.se, using Redux, jQuery, and Bootstrap.
- Converted wireframes to user interfaces and improved front-end infrastructure and routing.

Sep 2019 — Jan 2021

Stockholm

Software Developer at Beamon People (Alten Sweden)

- Engaged in full-stack development using HTML5/CSS3, React.js, Typescript, Redux, Nest.js, Python, and Contentful CMS.
- Involved in all stages of development, from initial stack decisions to product launch and maintenance.
